

**BNP (Brain [B Type] Natriuretic Peptide)  
and Entresto™**

Effective November 2, 2015, there is a new interpretive comment appended to all BNP test results:

“Use caution when interpreting BNP results on patients treated with Entresto™.”

The recently-approved drug Entresto™ will have an impact on a patient's BNP levels that may make that test inappropriate for monitoring that patient.

Questions regarding this test may be directed to Cheryl Haskins, MS, MT(ASCP)SC, Manager, Chemistry and Referral Testing, at 315-410-7014 or [cherylhaskins@lacny.com](mailto:cherylhaskins@lacny.com).
