

Adjusted Test Schedule for GC/Chlamydia Testing

The Microbiology department of Laboratory Alliance of CNY performs testing for *Chlamydia trachomatis* and *Neisseria gonorrhoeae* on urogenital and urine specimens using an amplified nucleic acid technology. In addition, the same technology is used to test specimens for the presence of *Trichomonas vaginalis*.

Effective Monday, May 21, 2018, the molecular testing for these microorganisms will be performed on Mondays, Wednesdays, and Fridays.

Please contact Dr. Paul Granato, Director of Microbiology, (315-410-7036) or Mr. Russell Rawling, Microbiology Manager, (315-410-7060), if you have any questions or concerns.
